

What you need to know...

Services Available

Electricity

It is important that you supply the correct information on your Exhibitor Application Form for the electrical items you will be bringing along. This will enable us to check/calculate your total wattage requirement before invoicing.

Please note that the use of generators is not permitted, and any exhibitor found using one will be asked to stop and will be charged for an electrical supply.

Water

There are 4 water tap points available for your use within the castle grounds.

Internet

There is limited public Wi-Fi available due to the nature of the venue. If you wish to apply to have a cabled Internet feed (this is a cable plugged into your card machine only) then please make sure this is stated on your application form – you will also need to book an electric supply.

Recycling & Waste Management

Zero Waste is the Festival's waste management team, who are responsible for the provision of the relevant facilities on site to accommodate this during the event. NB All exhibitors will be notified well in advance of the current recycling/waste policy in place for the event.

Medics

A professional Medical Team will be on site during the opening times of the Festival.

Over Night Security

A contracted SIA security team will patrol the site overnight. However, please note that exhibitors are responsible for the safekeeping of all goods or items on their stands and are left at their own risk.
